

Introducing Dash ComplyOps

SOC 2 Compliance Automation

Dash ComplyOps provides a unified platform for organizations to develop, automate, and manage their [SOC 2](#) security program and internal controls. With Dash, teams can efficiently prepare and achieve SOC 2 certification.

- ✓ **Get SOC 2 Ready In 30 Days** – Dash enables teams to address security requirements and prepare for a SOC 2 audit in less than 30 days.
- ✓ **Build SOC 2 Into DevOps** – Advanced monitoring enables teams to build SOC 2 controls into existing DevOps processes.
- ✓ **Connect Security And Compliance** – Connect compliance requirements with technical controls and keep Security and DevOps teams on the same page.
- ✓ **Manage Internal Controls** – Quickly see your compliance status and ensure SOC 2 controls are up-to-date.

Close More Deals

Meet client expectations, streamline security procurement, and close larger enterprise deals.

Validate Security Efforts

Validate your organization's overall security effectiveness by receiving your SOC 2 Type 1 or Type 2 report.

Steps to SOC 2 Certification

1. Prepare For SOC 2 Assessment

Utilize [Dash ComplyOps](#) to quickly build your SOC 2 security program and prepare for SOC 2 Type 1 and Type 2. With Dash, your team can build custom security policies, enforce policies through automated controls, and collect all evidence needed for audit.

Create Security Policies

- Security Roles
- Risk Assessment/Analysis
- Employee Training
- System Access

Enforce Technical Controls

- Cloud Configuration
- Networking
- Encryption
- Disaster Recovery

Collect Audit Evidence

- Cloud Security Settings
- Current Control State
- Security Policies
- Documents/Agreements

2. Conduct SOC 2 Audit

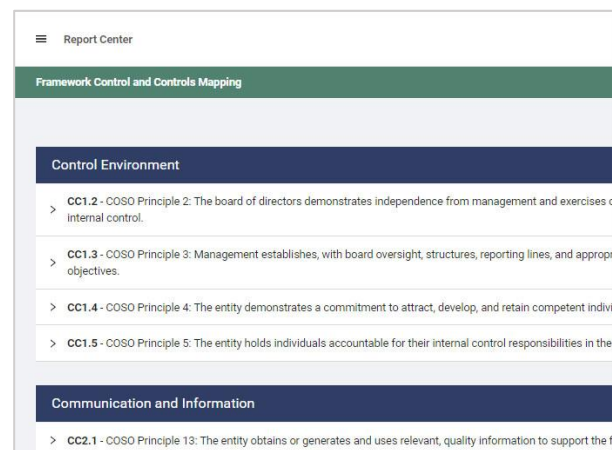

Work one-on-one with our auditing partners to set SOC 2 audit scope and complete your SOC 2 audit. Utilize Dash ComplyOps security evidence to expedite the audit process.

 **SOC 2 Type 1**

 **SOC 2 Type 2**

3. Maintain SOC 2 Controls

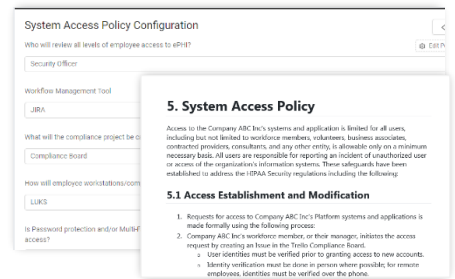

Use Dash ComplyOps to automatically inventory all security controls and cloud compliance evidence. Leverage security reports to manage cloud compliance programs and maintain SOC 2 criteria controls.

Dash ComplyOps Benefits

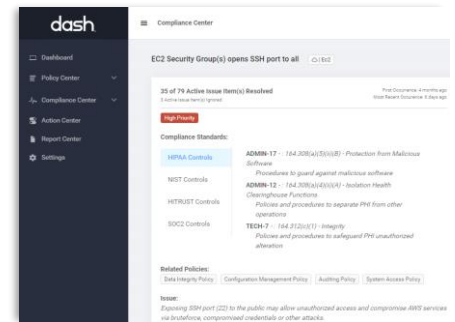

Create Custom Security Policies

Create 20+ compliance policies mapped to SOC 2 Trust Service Criteria (TSC). Quickly build policies by answering questions about your organization, tools, and technologies.

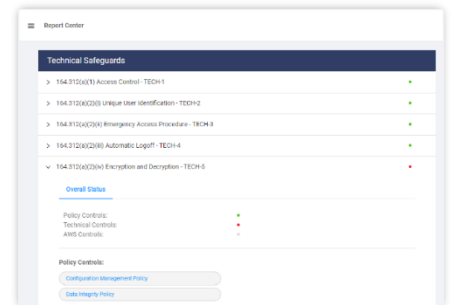

Policy Aware Compliance Monitoring

Enforce Dash created policies through continuous compliance monitoring. Easily maintain a robust cloud compliance program and meet requirements.

Work With Compliance Experts

Work one-on-one with Dash compliance experts to customize your security program and build around your organization and technologies.
